

WISE-AI PROJECT: UPDATES AND ACHIEVEMENTS SECOND PROJECT PHASE

Welcome back to the second edition of our WISE-AI project newsletter. The past few months have been intense—we have conducted important research, organized a partner meeting, and initiated new activities. Here's the latest update on the project's progress.

● EU REPORT – RESEARCH FINDINGS AND RECOMMENDATIONS

We have completed the EU Report, which summarizes the results of our surveys and focus groups. This document provides in-depth insights into young women's perspectives on artificial intelligence, the challenges they face, and opportunities to enter the technology sector.

The report includes:

- Collected data from surveys and focus groups
- Key challenges faced by women in the AI field
- Recommendations on how to increase female participation in the sector

The report is available in English and all partner languages.

● SECOND PARTNER MEETING IN LISBON

On February 11, the second WISE-AI partner meeting took place in Lisbon, Portugal. During this event, we reviewed the completed activities and planned the next steps.

During the meeting, we:

- Discussed the next steps in the development of the Knowledge Portal
- Started shaping the Minecraft educational game concept

This meeting helped us clearly define the next phases of the project and ensure smooth implementation.

● COMING SOON – KNOWLEDGE PORTAL

One of our main current tasks is the development of the Knowledge Portal. This will be a learning platform designed for anyone interested in expanding their knowledge of artificial intelligence.

The portal will include:

- Educational materials on AI
- Practical tools and methodologies

We plan to launch the portal soon—stay tuned for updates.

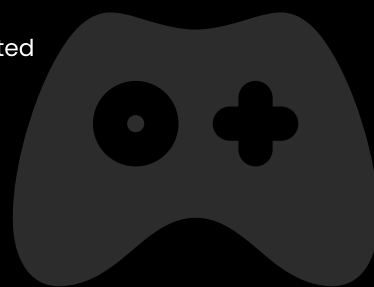

● MINECRAFT EDUCATIONAL GAME

To promote interactive learning and engage young women in technology, we have started developing the concept for a Minecraft educational game.

The game will help participants:

- Learn the basics of artificial intelligence
- Discover AI applications in various fields
- Understand how technology contributes to the Sustainable Development Goals

We are currently in the creative phase, generating ideas and shaping the game structure. Thank you for following our project updates. In the coming months, we will share more details about our ongoing initiatives. See you in the next newsletter!
